6. Please explain your rating above regarding academic integrity of AI use for this
submission. Why? (Write in 2-3 sentences) *

I would limit this one to somewhat acceptable because I'm not really sure, I
guess an AI would write a pretty solid documentation for the project when
given the right context, but is that leaving any room for reflection? However,
for the code part I think its pretty useful to have AI involved because it just
lets you blaze through some of the code in HTML that is usually lengthy to
write, I suppose as long as the AI is used to make work more efficient and it

What made you abandon using the AI tool? Were you more successful using other resources? Input N/A if you have not used any

Sometimes it was just easier to use stack overflow for common errors and desired functionality rather than asking ChatGPT to fix/help with my code

when a human and AI work together there's a lot of time saved as long as its not a net negative in time lost due to no understanding and plain copy pasting.
